

DragKing Baseball Field Drag Model 10001665

Your DragKing Box Should Include:

- Drag Section
- Pull Chain with Shackle
- Debris Basket Section
- (4) Quick Link Connectors

ASSEMBLY

1. Remove the drag sections from box and lay them out on ground one behind the other with debris basket at the rear.
2. Open the quick link connectors (#1). Use two connectors to attach the pull chain to the front corner holes of the drag section. Use two connectors (one on each side) to attach the sections to each other. Once the chain and sections are connected, close the quick link connectors. The anchor shackle in the center of the chain is used to connect the chain to the vehicle used to pull the DragKing.
3. The planer blade (#2) is shipped in the up position. Keep the blade in the up position if you pull the DragKing by hand. Use two 1/2" or adjustable wrenches to loosen the retainer bolts and lower the blade to make a deeper cut when pulling the DragKing with a vehicle (Max 5 mph). For hard packed soil, remove the retaining nuts and bolts and reverse the blade to place the serrated side down. Adjust the blade to the desired depth before use. Use the smooth edge for leveling. When pulling the DragKing with a vehicle, adding concrete blocks or other ballast to the drag section will help it cut the surface better.
