

Product Benefits

Lower paint cost — Save hundreds of dollars by eliminating the need for costly, clog prone and toxic aerosol cans. The Rollmaster™ 5000 uses economical 5-gallon pails of bulk paint. Use water or oil base paints, even the environmentally safe latex and low VOC paints. Little or no thinning required.

Not recommended for use with lacquer, fast dry or epoxy paints.

Easy Clean Up — Clean up is quick and easy. Simply rinse the roller mandrel and paint delivery tubes. The inexpensive roller cover can be disposed of after each use. No tank, pump, spray gun or hoses to clean.

Quiet and Efficient— No engine noise, compressor sounds, harmful fumes, or over spray to deal with. Stripe inside or out anytime day or night in near silence. Plus, with no over spray you can stripe within 2 inches of cars, walls or other obstacles.

Product Overview

The RollMaster™ 5000 Line Painting Machine is perfect for marking large parking lots, factory floors or warehouse aisles. Quickly stripe 2000 feet of line with one 5-gallon pail.

Safe and Easy to Use

The RollMaster™ 5000 is so simple and easy to handle you can do a great striping job your first time out:

1. Roller driven peristaltic pumps sends paint directly from the standard 5 gallon pail to the roller
2. Built in charger. One charge will stripe over 24 hours
3. No engine, compressor or high pressure hoses means there is no oil to change, no toxic fumes, and no flammable gasoline.

Specifications

Item Name	Newstripe RollMaster™ 5000 Line Painting Machine
Item Number	10003068
Application	Pavement and Warehouse flooring
Capacity	5-gallons of bulk paint (5-gallon pail included)
Restrictions	Not recommended for use with lacquer, fast dry or epoxy paints.
Equipment Requirements	12 volt, rechargeable battery (not included)

Warranty	18 Months
Shipping weight	65 lbs
Includes	110 volt plug in battery charger and 4" roller kit. Kit includes (3) 4" roller cover, (1) paint hose, (1) trough liner, (6) concrete discs and (6) asphalt discs.

Pavement and warehouse line striping without gas or electric power.

Easy to Use – So simple you can do a great striping job your first time out. Foolproof tubing squeeze pump delivers paint from standard paint can directly to the foam roller which can last up to a mile.

Consistent lines— with lines 5 times thicker than aerosol and without overspray the Rollmaster 5000 can stripe even in food warehouses where gas machines cannot be used. It can also paint between cars without fear of overspray. The paint rollers ensure a crisp clean line of paint for a quality thicker line than any aerosol can.

Easy to operate switch and single hand operation of Carrier Lever – Electrical single button switch allows for easy control of paint flow and Carrier level lets the user raise and lower the painting roller to move from line to line or to paint dash lines.

Pump never touches paint – The Rollmaster's Peristaltic roller pump never touches paint meaning no clogs and produces no fumes means you can use this versatile machine anywhere including food warehouses.
