

DirtDoctor™ 3-Point Hitch Infield Drag & Groomer 10003681

Benefits

Easy to Use

Just attach it to your field tractor or utility vehicle using the innovative 3-point hitch and you are ready to start grooming your field with increased control and stability.

Fast & Efficient

Quickly adjust the machine to your infield grooming needs without any tools.

Built to Last

Proudly Made in the USA with welded steel construction and quality components to provide years of trouble-free service.

Overview

The **DirtDoctor™ 3-Point Hitch Infield Drag & Groomer** gives you all the performance of much larger infield grooming machines at a fraction of the cost. Designed to be pulled behind a field tractor or utility vehicle, the DirtDoctor can plow, pulverize, drag, compact, and finish in just one pass. Plus, all adjustments can be made quickly and require No Tools!

- Adjustable center drag and reversible cultivator blades.
- Balanced roller stabilizes groomed soil.
- 3 height positions for blades & pulverizer bar (2 for cutting and 1 for transport).
- Optional finishing brush (sold separately).
- Made in the USA and Free Shipping available.

DirtDoctor™ 3-Point Hitch Infield Drag & Groomer

10003681

Product Features

Easy Towing		Just attach the DirtDoctor to your field tractor or utility vehicle using its 3-point hitch and you are ready to start grooming your field. The built-in transport wheels allow the unit to be moved with ease.
No Tools Required		All adjustments on the DirtDoctor 3-Point Hitch model can be made quickly and easily without tools. You can easily fine tune the reversible harrow teeth, pulverizer bar, transport wheels, and optional finishing brush or drag mat to give your infield the perfect playing surface.
Powerful Ripper Teeth		This infield drag & groomer has 10 heavy-duty blades that rip through compacted dirt to create loose soil. It can rejuvenate any baseball field, dirt lot, rodeo area, or prepare soil for seeding.
Balanced Roller		The balanced roller provides the finishing touch to your infield by leveling out any lumps and re-compacting the playing field. You can also attach the optional finishing brush or drag mat.
