

RollMaster™ 1000 Line Painting Machine 10003856

Benefits

- Lower Paint Costs**
 Save hundreds of dollars by eliminating the need for costly, clog-prone, and toxic aerosol cans.
- Use Standard Paint Cans**
 The RollMaster 1000 uses standard 1-gallon cans of water-based and oil-based paint. You can also use environmentally-safe latex and low VOC paints.
- Easy Clean Up**
 Clean up is quick and easy. Simply rinse the roller mandrel and paint delivery tubes. The inexpensive roller cover can be cleaned or disposed after each use.
- Quiet & Efficient**
 No engine noise, compressor sounds, harmful fumes, or overspray. Stripe anytime day or night in near silence. Plus with no overspray, you can stripe close to cars, walls, or other obstacles.

Overview

The **RollMaster™ 1000 Line Painting Machine** is perfect for marking large parking lots, factory floors, or warehouse aisles. With this versatile machine, you can quickly stripe up to 400 feet with a single gallon of paint.

Fast & Simple to Use

The RollMaster 1000 is so simple and easy to handle that you can do a great striping job on your first time out.

1. Roller driven peristaltic pump sends paint directly from a standard 1-gallon paint can to the roller.
2. No engine, compressor, or high pressure hoses means there is no oil to change, no toxic fumes, and no flammable gasoline.
3. Foldable handle allows for easy transport and storage.

Product Features

Easy to Use

Operating your RollMaster 1000 machine is so simple that you can do a great striping job on your first time out. Foolproof tubing squeeze pump delivers paint from a standard paint can directly to the foam roller. It is light weight at 30 lbs and easy to handle.

Pump Never Touches Paint

The RollMaster's peristaltic roller pump never touches the paint so paint clogs are never a problem. In addition, this machine has no engine and therefore produces no fumes so you can use this versatile machine anywhere, including food warehouses.

Consistent Lines

Maintain straight, consistent, and perfect lines every time with the simple hand trigger that provides user control and precise paint flow. You can stripe different line widths with 4" rollers (included), 3" rollers, and 2" rollers, which are purchased separately.

Foldable Handle

The folding handle makes it easy to store and transport your RollMaster 1000 between locations. Its compact design will easily fit into most vehicles.
