

AeroVent® Standard Aerosol Can Disposal System 10004840

Benefits

Lower Waste Costs

Save hundreds of dollars by processing your hazardous aerosol cans in-house versus sending them out to be processed.

User Safety

AeroVent is designed with user safety in mind and includes multiple built-in safety features that provide unique protection.

Quick & Efficient

Single stroke operation allows user to puncture and drain used aerosol cans quickly and efficiently.

Compliance

Stay compliant with regulators by processing your used aerosol cans the right way. AeroVent is compliant in all 50 states and adheres to OSHA, EPA, and California regulations.

Overview

The **AeroVent® Standard Aerosol Can Disposal System** allows you to quickly puncture and drain used aerosol cans to reduce the cost of hazardous waste. It is compliant in 50 states and adheres to OSHA, EPA, and California regulations.

- Simple and easy to use. Just load, puncture, and dispose.
- Only takes 5 to 30 seconds to depressurize and drain cans.
- Unique built-in safety features protect user from blow back.
- Innovative Viz-a-Ball indicator lets user know when aerosol can is fully depressurized and system is safe to open.
- Proudly Made in the USA & Free Shipping Available.

Product Specifications

Application	Aerosol Can Disposal
Processing	1 can at a time
Can Sizes	Variable up to 3" diameter & 9.75" length
Carbon Filter Used	AeroVent Safe2Vent Filter
Safety Features	Safety check valve & spark resistant parts
Compliance	Compliant in 50 states and adheres to OSHA, EPA & CA regulations
Origin	Proudly Made in the USA
Warranty	18 Months
Dimensions	30" L x 8" W x 11" H
Ship Dimensions	20" L x 12" W x 9" H
Ship Weight	28 lbs

AeroVent® Standard Aerosol Can Disposal System

10004840

Product Features

User Safety		The AeroVent Standard features a completely enclosed chamber that is sealed during the puncturing process to protect the user. Spark-resistant features include an aluminum lined can tray, cobalt puncture point, and anti-static grounding cable.
Compliance		AeroVent's check valve closes the filter outlet to comply with OSHA, EPA, and California regulations requiring the drum to be closed and prevent vapors from escaping when the machine is idle.
Long Lasting Carbon Filter		The AeroVent Safe2Vent Filter (included) contains more carbon than many other drum filters on the market for longer life. The environment friendly cellulose filter is 96% biodegradable and naturally decomposes compared to plastic encased filters that take years to breakdown. Plus, each Safe2Vent Filter includes a built-in coalescing element.
Versatile		The AeroVent Standard is designed for the smaller volume user. It's unique tray design accepts a variety of aerosol can sizes up to 3" in diameter and 9.75" in length with just one tray. Quick change aluminum plugs accommodate most sizes of aerosol cans without having to change gaskets or liners.
