

AeroVent® Crush 3X Aerosol Can Disposal System 10004525

Benefits

Budget Friendly

Combining two popular technologies from Newstripe, the AeroVent Crush 3X is a cost effective, budget friendly solution for end-to-end aerosol can recycling and disposal.

User Safety

Multiple built-in safety features have been designed into this machine to ensure user safety from start to finish.

Lower Waste Costs

Save hundreds of dollars by processing your hazardous aerosol cans in-house instead of sending them out to be processed.

Compliance

Stay compliant with regulators by processing your used aerosol cans the right way. The AeroVent Crush 3X is compliant in all 50 states and adheres to OSHA, EPA, and California-specific regulations.

Overview

With the **AeroVent Crush 3X Aerosol Can Disposal System**, you can puncture, drain & crush used aerosol cans for safe and compliant waste disposal. This innovative all-in-one solution delivers superior performance, fits various aerosol can sizes, and prioritizes safety.

- Reduces aerosol can waste by up to 75% by compacting cans using standard shop air
- Multiple safety features including proprietary Viz-a-Ball Indicator on filter tells user when puncturing system is safe to open
- Biodegradable filter can be discarded in standard waste streams
- Compliant in 50 states & adheres to OSHA, EPA & CA regulations
- Sturdy metal stand (36" H) is included
- Proudly Made in the USA and Free Shipping is available.

Product Specifications

Application	Aerosol Can Disposal & Waste Compaction
Air Requirements	Standard Shop Air (85-115 psi, 9 cfm @ 100 psi)
Processing	Up to 3 aerosol cans at a time
Can Sizes	Variable up to 3" diameter & 10.5" length
Compliance	Compliant in 50 states and adheres to OSHA, EPA & CA Regulations
Origin	Proudly Made in the USA
Warranty	18 Months
Ship Dimensions	Box1: 37"L x 24"W x 48"H / Box2: 23"L x 18"W x 14"H
Ship Weight	Box1: 220 lbs / Box2: 51 lbs

AeroVent® Crush 3X Aerosol Can Disposal System

10004525

Product Features

Economical		The AeroVent Crush 3X is a high-volume aerosol can disposal system priced lower than many competitive solutions. It is faster and processes up to three cans at a time. Plus, the AeroVent Safe2Vent Filters have more carbon media, last longer, and are more budget friendly than other filter options.
Unique Safety Features		Our innovative Viz-a-Ball safety indicator and check valve serve two essential functions. First, they keep the operator safe by indicating when the system is depressurized and safe to open. Second, the ball check valve complies with OSHA, EPA, and California regulations requiring the drum to be completely closed to prevent vapors from escaping when the machine is idle.
Safe2Vent Filter		The cellulose construction of our AeroVent Safe2Vent Filter (2 included) is 96% biodegradable, may be recycled more easily, and decomposes naturally. Other drum vent filters are plastic encased and often require more extensive disposal processes. Each filter includes a unique coalescing element to promote safe handling.
Versatile		The AeroVent Crush 3X accepts a variety of aerosol can sizes up to 3" in diameter and 10.5" in length. The quick-change aluminum guides in the puncturing system make it ideal for larger volume users of aerosol cans. Plus, the crushing unit can be used on its own to crush other types of used containers like paint cans and pails.
