

AeroVent® 3X Aerosol Can Disposal System 10004721

Benefits

Lower Waste Costs

Save hundreds of dollars by processing your hazardous aerosol cans in-house versus sending them out to be processed.

User Safety

AeroVent 3X is designed with user safety in mind and includes multiple built-in safety features that provide unique protection.

Viz-a-Ball Indicator

Viz-a-Ball safety indicator tells operator when aerosol cans are depressurized and safe to remove.

Compliance

Stay compliant with regulators by processing your used aerosol cans the right way. AeroVent 3X is compliant in all 50 states and adheres to OSHA, EPA, and California regulations.

Overview

The **AeroVent® 3X Aerosol Can Disposal System** is the big brother to the AeroVent 1X. It processes up to three cans at a time, making it one of the fastest aerosol can recycling machines. It is compliant in all 50 states and adheres to OSHA, EPA, and CA regulations.

- Simple and easy to use. Just load, puncture, and dispose up to 3 cans at a time.
- Only takes 5-30 seconds to depressurize and drain cans.
- Unique Viz-a-Ball safety indicator with safety check valve.
- Protected by U.S. Patent No. 10,427,081 B1
- Proudly Made in the USA & Free Shipping Available.

Product Specifications

Application	Aerosol Can Disposal
Processing	Up to 3 cans at a time
Can Sizes	Variable up to 3" diameter & 10.5" length
Carbon Filter Used	AeroVent Safe2Vent Filter (uses 2 filters)
Safety Features	Viz-a-Ball safety indicator, safety check valve & spark resistant parts
Compliance	Compliant in 50 states and adheres to OSHA, EPA & CA regulations
Origin	Proudly Made in the USA
Warranty	18 Months
Dimensions	34" L x 14.5" W x 12.5" H
Ship Dimensions	23" L x 18" W x 14" H
Ship Weight	51 lbs

AeroVent® 3X Aerosol Can Disposal System

10004721

Product Features

Economical		The AeroVent 3X is a high-volume aerosol can disposal system priced lower than many single-can units. It is faster and processes up to three cans at a time. Plus, the AeroVent Safe2Vent Filters used with this machine have more carbon media and are more cost effective than other filter systems.
Viz-a-Ball Indicator		Our innovative Viz-a-Ball safety indicator and check valve serve two essential functions. First, they keep the operator safe by indicating when the system is depressurized and safe to open. Second, the ball check valve complies with OSHA, EPA, and California regulations requiring the drum to be completely closed to prevent vapors from escaping when the machine is idle.
Safe2Vent Filter		The cellulose construction of our AeroVent Safe2Vent Filter (2 included) is 96% biodegradable, may be recycled more easily, and decomposes naturally. Other drum vent filters are plastic encased and often require more extensive disposal processes. AeroVent Safe2Vent Filters also contain more carbon media than other available filters, so they last longer. Each filter includes a coalescing element for safe handling.
Versatile		The AeroVent 3X has a unique tray design that accepts a variety of aerosol can sizes up to 3" in diameter and 10.5" in length. The quick-change aluminum guides accommodate most sizes of aerosol cans making the AeroVent 3X ideal for larger volume users of aerosol cans.
