

Due to complex shipping rules, the following NewStripe models do not come with a battery included. They utilize a common 12V battery that can be easily purchased at a local auto parts or battery store.

		
<p><b>EcoLiner Standard</b> 10004483</p>	<p><b>EcoLiner Plus</b> 10004484</p>	<p><b>RollMaster 5000</b> 10003068</p>

## Recommended Batteries

We recommend a high performance 12V 18Ah AGM battery with the following dimensions:  
6-7/8" L x 3-7/16" W x 6-1/8" H.

Some popular battery models that work well with our battery-powered field strippers include:

- **Interstate Batteries** (Part# FAYTX20H)
- **NAPA Auto Parts** (Part# PSB 20BS)
- **O'Reilly Auto Parts** (Part# GTX20BS)
- **Yuasa** (Part# YTX20-BS)
- **PowerSonic** (Part# PTX20-BS)
- **SigmasTek** (Part# STX20-BS)

### IMPORTANT NOTES

As you look at the side of the battery with the terminals, correct orientation is +/- (Positive left side & Negative right side).

The battery part # should not have a letter "L" in it as the terminal orientation will be incorrect.
